Mark
Professional emergency backpack

Mark is an extremely versatile product, made to suit the different requirements of all types of customers. It's structure allows it to suit all conditions and as well as it's modern design that allows a rational use of the outside and inside space, it also has a rigid PVC structure that gives a unique advantage to its intrinsic strength and internal protection.

Made in Cordura®, it is completed with high visibility reflective bands and a reinforced PVC bottom part with protective rubber .
Mark can be used as a bag or backpack; the shoulder straps can be placed in a zipper closed pocket.

Mark is divided in three sections:

- On the front part there is a small outer pocket with Star of Life and Spencer embroidery and another two zipper closed pockets for radio or cell phone
- In the middle zone of the bag, a highly protected zone closed by a double zipper is dedicated to sterile products, catheters and and surgical instruments
- A big compartment with five colour coded pouches M Series, fixed with Velcro®, allow a perfect division of all equipment for an easy localization during an emergency

Dimensions: 510x360x320 mm

Emergency
Emergency bag

We have concentrated on the functionality of the product: a lightweight bag, easy to handle and easy to clean. Eliminating the superfluous, all you have left is the handiness of the product and the convenience of its price. Made of nylon, it has a central compartment where you will find on the inside a premodelled and semi-rigid compartment with three dividers to store a small oxygen tank and other resuscitation devices, the closure of the top flap is fast and safe thanks to the Velcro® strap all around the front border. There are also two side pockets with zipper. The Emergency stands out for the global character of its range: it is available in fact in different languages.

Dimensions: 500x230x230 mm

Response Series
Multi-purpose bag

Response is an ideal, multi-purpose bag for the paramedic or volunteer who needs a robust holder in which to organise all the equipment necessary for use in First-aid. Thanks to its compact structure and the variety of ways in which it can be used, it is suitable for any occasion.

It is made of tear proof Oxford nylon which is easily washable. It consists of a rigid under part and of a soft part. The lower part is in preformed shockproof plastic and divided into compartments to permit correct organisation of the contents. Both are easily accessible, thanks to the use of zip openings. A transparent, external pocket with access from inside, allows for the placing of lists or to personalize the bag in a rapid, safe and secure manner.

Response is fitted with handles that have variable positions and an adjustable strap which permits use as a knapsack or as a bag, complete with spring catches and metal rings, in acetate resin, which if necessary will permit belt attachment of the bag.

Response
Multi-use emergency bag

In the lower part of the soft bag, a series of elastic loops and a pocket that closes with Velcro®, allow for the placing of varied types of accessories. On the fly-front opening of the upper part, there are elastic loops.

Dimensions: 465x270x270 mm
Weight: 1,2 kg
